SCT10N120

Silicon carbide Power MOSFET 1200 V, 12 A, 520 mΩ (typ., TJ = 150 °C) in an HiP247™ package

Datasheet - production data

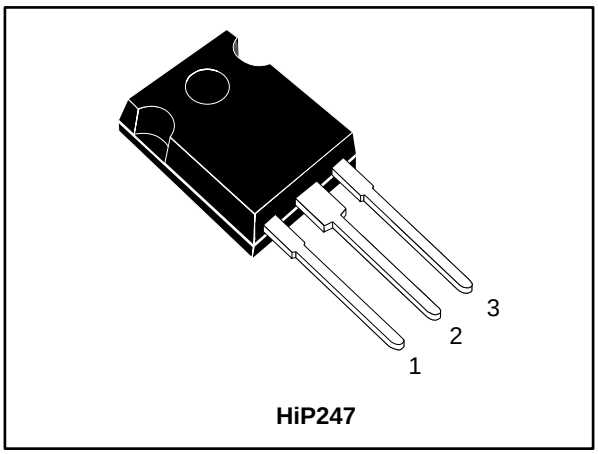

Figure 1: Internal schematic diagram

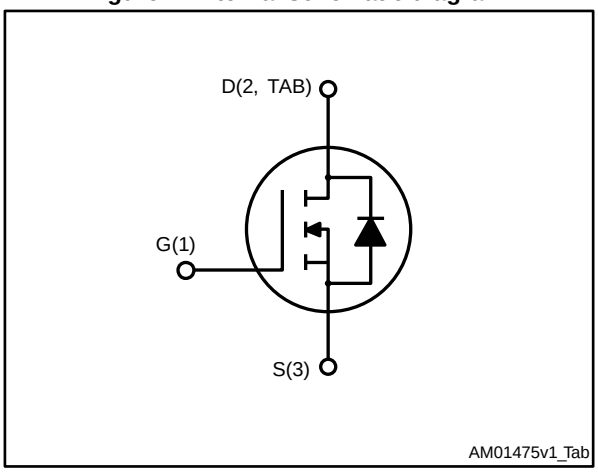

Features

- Very tight variation of on-resistance vs. temperature
- Slight variation of switching losses vs. temperature
- Very high operating temperature capability (T_J=200 °C)
- Very fast and robust intrinsic body diode
- Low capacitance

Applications

- Solar inverters, UPS
- Motor drives
- High voltage DC-DC converters
- Switch mode power supplies

Description

This silicon carbide Power MOSFET is produced exploiting the advanced, innovative properties of wide bandgap materials. This results in unsurpassed on-resistance per unit area and very good switching performance almost independent of temperature. The outstanding thermal properties of the SiC material, combined with the device's housing in the proprietary HiP247™ package, allows designers to use an industry-standard outline with significantly improved thermal capability. These features render the device perfectly suitable for high-efficiency and high power density applications.

Table 1: Device summary

Order code	Marking	Package	Packaging
SCT10N120	SCT10N120	HiP247™	Tube

The device meets ECOPACK standards, an environmentally-friendly grade of products commonly referred to as "halogen-free". See *Section 6: "Package information"*.
