

ReSpeaker Pro Case

SKU 114070001

Description

This little elegant case is officially produced by SeeedStudio, so it is probably the most suitable case which you can get for ReSpeaker. The design is compact while at the same time provides enough space for one ReSpeaker core plus one ReSpeaker Far-field MIC array. There isn't much ornament except the rounding aperture that makes your voice more reachable and the translucent circular ring that indicates light generated from the ReSpeaker inside.

Features

- Specifically designed for Respeaker core.
- Easy to use
- Compact design
